This sleek unit with six bright LED lights has replaced the older unit using two fluorescent blacklight tubes plus **it's collapsable and folds in half - no tools needed!** It still attaches to the 40" x 48" board you assemble yourself but attaching arms may need slight modification to fit the fully-assembled folding sketchboard. As always, your message, when painted with fluorescent paints, will glow. Effective at night or inside auditoriums. This unit comes all wired, ready to use. Recommended operating power is 12 volt only. Portable utility batteries are readily available at retail auto, department or tractor stores and attaches to the battery via two alligator electrical clips which are included.
